

webRTC.ventures is a team that gets things done and an overall pleasure to work with and interact with on a daily basis.

**Ben Hose, Co-Founder, CTO
TripDoctor**

Why webRTC.ventures?

We selected webRTC.ventures because we were looking to develop a web application and platform that utilized **telemedicine to connect travelers and doctors**. Over 4 months, we conducted an extensive vetting process and analysis of hundreds of potential technology & development partners. During the search, we reached out to the **TokBox team**, the leading technology provider of WebRTC services, and they provided us with a short list of recommended developers, including **webRTC.ventures**.

We decided to work with webRTC.ventures because of the quality of their previous work (in the WebRTC and web application space) and the ease of communication from the executive team down to each individual member of the development teams. Development and project costs were very competitive with other quality firms.

The entire webRTC.ventures team has been very collaborative, supportive, and flexible in meeting the needs of technology startups.

Rate Us!

From 1 to 3, how would you rate your experience with us?

1

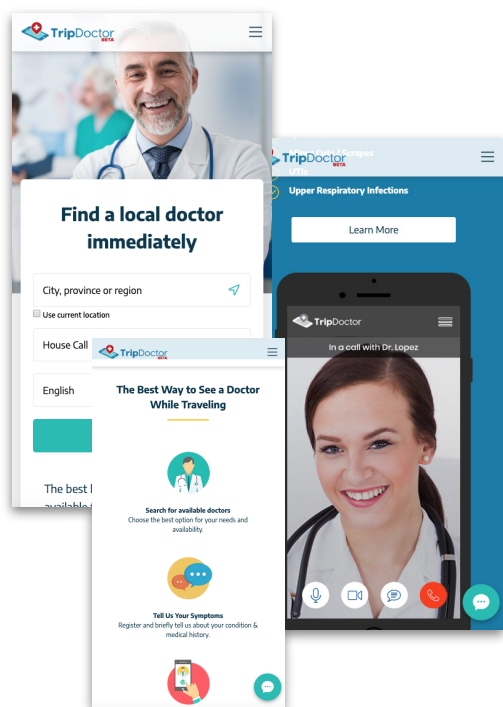

With 1 being the best, I would rate working with webRTC.ventures a 1.

They have been able to deliver on all of our development needs and help us bring our technology to the marketplace. As we build out an in-house development team, we will continue to utilize the webRTC.ventures team for thought leadership, development, and support in future product development.

1

With 1 being the best, I would rate webRTC.ventures a 1 in solving our pain points.

During the MVP application development process, we made many pivots in the core features and functionality of our product. The webRTC.ventures team was very agile in meeting our development needs and helping us overcome any challenges in building our robust application.

Achievements

We have been able to release a **Beta version** of our application and are preparing for launch of our services across **5 countries and 25+ cities** next month. We have been able to onboard providers and organizations onto our platform across these **5 countries** and are in the process of closing on an additional round of seed funding. We are also actively engaged in partnership discussions with multiple stakeholder groups and enterprise level customers as a result.

webRTC.ventures exceeded our expectations in terms of cost, quality of developers, communication, and project management abilities.
